

Snow Science and Avalanches

March 7th, 2019

6pm-8pm

BP Energy Center

1014 Energy Court

Anchorage, AK 99508

~~\$15/attendee~~

~~\$10/attendee~~

\$5/attendee*

Includes dinner &
Certificate for 2 PDHs

Course Description

Seasonally covering about a third of earth's land surface, frozen precipitation remains as important to climatology as it is to recreation. Through Ed's background in Sub Zero and Cold Research laboratories, this presentation will dive into the micro-structures of snow and how it relates to the snow cover we love to play on.

Instructor: Edwards Adams Ph.D.

Professional Accomplishments:

- B.S. Earth Sciences, M.S. Engineering Mechanics, Ph.D. Mechanical Engineering
- Professor (2004-2018): Montana State University
- Outstanding Researcher Award 2006, 2003, 2002, Montana State University
- Japanese Government Research Awards for Foreign Specialists
- Editor for *Journal of Glaciology and Snow Engineering*

* ASME members receive free entry
